

- **Non-Conformance Report**

When doing the assignment, I encountered a few problems. With the help of my tutor, fellow classmates, notes in the lectures and research on the internet, I managed to solve them.

- **The problem**

When running the codes, I had spelling and writing mistakes. During intense analysis, I found them and fixed the issues.

One of the gigantic errors that I could not solve is the date on the graph is not being displayed therefore other readers may not comprehend the purpose of the graphs.

- **How it occurred**

It occurred because the amount of data is too large.

- **How to prevent it from happening again**

Take help from tutor in class to better understand how to plot the graph when there is a large range of values.

- **Plan or time estimate to fix**

The plan is to go into deeper research or seek assistance from tutors or professionals in the programming industry to fix this issue. To debug this issue, it can cost a lot of time definitely.
